PROJECT EXPERIENCE

AI COMPLIANCE DASHBOARD — Jaipur, India
Analyst — Aug 2024 – Jul 2025

- **Data Visualization:** Developed an AI-powered compliance dashboard to analyze and visualize risk enabling the operations team to make faster data-driven decisions about maintaining or offboarding customer relationships by researching risk trends, using SQL and Python to build the UI, and managing internal and external stakeholder communication. https://ai-compliance-dashboard-ashen.vercel.app/.

WORK EXPERIENCE

EMERITUS — Remote
Manager – Product — Aug 2025-Apr 2026

- **Product Strategy & Development:** Shaped product direction across pricing, positioning, and value proposition for new and existing offerings, partnering cross-functionally to translate market needs into product decisions.
- **Go-to-Market Strategy:** Defined targeting and messaging strategy in partnership with marketing, connecting product positioning to commercial execution and demand generation.
- **Cross-functional Leadership:** Orchestrated stakeholders across marketing, sales, delivery, and external partners to drive alignment and execution - signals the stakeholder-management muscle strategy roles need.
- **Leadership:** Mentored Associates on product development, GTM thinking, and analytical rigor as part of early people-leadership responsibilities.

DEUTSCHE BANK — Jaipur, India
Senior Operations Analyst — Aug 2022-Jul 2025

- **Risk & Compliance Analytics**: Analyzed 200+ FIC clients to identify risk indicators, data gaps, and workflow trends through structured client and transaction data analysis; developed an Excel tracker that reduced manual processing effort by ~15%.
- **Quality Assurance:** Conducted QA reviews of KYC/EDD cases, validating client information, supporting documentation, risk assessments, and review outcomes to identify errors and ensure adherence to internal quality and compliance standards.
- **Data Quality**: Identified and resolved inconsistencies across 300+ client profiles and supporting documents, improving data completeness and accuracy while reducing downstream rework.
- **GenAI & Automation:** Contributed to a GenAI automation initiative for due-diligence workflows, supporting document retrieval, data extraction, and compliance checks to reduce repetitive manual effort and improve information-processing efficiency.
- **Stakeholder Management:** Collaborated with Relationship Managers, Compliance, and Transformation teams to resolve data-quality issues, communicate QA findings, and improve cross-functional reporting.

INTERNSHIP
